Rec'd March 5th

My Dear Engelmann

BOTANIC GARDEN, CAMBRIDGE, MASS.

Feb. 28 187[illegible].

Having reached the evening of the last day of this long cold winter — and a bitter cold day it is — before to the last. it is time I showed you some signs of life and interest. I have had a weary time of it since I went to Washington 6 weeks ago. My right arm is still lame, and I have fits of coughing. But within the last 2 or 3 days I have felt some returning vigor and elasticity — which I feared I had lost altogether.

Well, at length I

I have drawn the Lycopo-
dium for Fl. N.
Amer. and have only
to write them out for
Fl. California and to
write out a little Cu-
pressus, which I mean
to print in Pac. Rail. Rep.
I am not sure which
family I will take next
— whether Gentianeæ
— or rather a bigger job
in Scrophulariaceæ
— I guess the latter —
when I read Mimulus
Synandra, & Orthocarpus,

Your Gentianeæ came
came too late to be
added to my last Cu-
pressus. They are now
left Kent till I write the

order — unless you will
do that for me. Do
that first. It is my
Arnica I need.

So that little thing is
Cicuta (Microcalia)
quadrans fulcans! Mull.

Advise I do not pretend
to know — and there is no
use keeping me to know —
like you have studied
them — no easy job
it does.

BOTANICAL GARDEN
ENGELMANN PAPERS

You must do at
least the Californian
Conifers — next sum=
mer.

When Shaw dies —
go up & take charge
of the establishment — &
make them give a good

and provide a quantity
nitrate, as well as Sulphur.
Let Grace take the
patients.

Thistles are anything
but pleasant to touch.

It is hard enough to have
those pre-all-hooked stem-
less ones in C. Drummondii -
- but to put in C. eriocephala
also too. ! ! !
Dr. send seeds of Physalis
edulis,

The full beard makes my
face look full; but I
am really thin.

Watson is working very
enthusiastically now at Silene -
when he has made as many
n. sp. as in Lupine!
My wife rather worn out,
but active. I have a sister
& 2 nieces with me this
winter - all invalids!
Ever dear friend Mrs. A. Gray

My Dear Asa.

Gray

Botanic Garden, Cambridge, Mass.

12 March 187 r

Thanks for your nice letter. So you can't be happy away from patients!

Well, he must get what he can out of you.

George should marry, and that soon — and, have a house of his own. You ought to be proud of grandchildren, & yes & Mrs. E. having the pleasure of them. Mrs Gray had got a "45 r" for 45 r.

Well, Natty is now Spermatia Linnaeana my

stand — thus, the real characters have escaped him. It is better than S. Coloradensis, after "Campanula Coloradensis" Buckley, I ranked up there this specially a year since again. I wish I had omitted results — Perhaps will add to a paper just gone to Minn Conspectus Synopsis Macoun —

Treatise a Sl. Campylocarpa:

1. S. leptocarpa
2. S. (non Lindheimeri Valke)

§ 2. Dysmicranthae:

3. S. bifloria, Campanula biflora R. & Pav. & Sw other names — amongst them S. Californicum Nutt. the species is very near S. falcata of Ledeb Nutt.

My Dear Engelmann

I have been camping about a letter from you: but I am too tired (from ascent of Pork mt etc) to respond to it now. I mean to write you from Martinsplace — where we hope to pass a few days soon. — and tell you of all our travel — to Augusta, Savannah, Chattahoochee (a pilgrimage to Torreya taxifolia) Appalachicola — where we had a good rest and a nice time with good old Chapman — there & back.

St. Louis & St. Ok. must be left for next year. I should now be at home & at work again.

Remind me to ask you about Pinus clausa of Chapman — which he did not publish. Can it be P. Glabra? Looks most like P. inops. Young stems smooth

Dear Engelmann

Botanic Garden, Cambridge, Mass.

May 8 1874

We have got home at
length. — Pretty well

Chapman had in
Mss. a "Pinus clausa" —
so called because the
cones keep closed & hold
their seeds for many (8—
12) years. He did not
publish it.

He showed me two of it
at N. Yours is a cone
(several years old) & a few
leaves.

I thought it might be O.
Glabra — but the cones
that look diff. You must
have better materials. What is
it?

My dear Engelmann

Your last is of May 13.—
Thanks. I came home to
town. My throat has got bad
again. Summer may cure
it. Rest it was time to
be at home again. I have
set a grist mixture on my part
of the Flora of California.—Gamo=
petalæ.

I take off with Scrophulariaceæ
when I went away — I have
now caught up correspondence
& odd jobs, & go at them again,
Gentianeæ later.

We are in sunny, Mrs. Gray
has lost her mother — stepmother — but she would not
feel it mine if I were one
Shall I send you some more
live Yucca granulate?

As to the Pines. I pulled
the leaves from my specimens;
some true as the cone —
was quite to send you
took. But I thought it
O. Plains when I some the two

Do you mean to go
on Old grand Presidio at
Detroit? Will there
come here, stay with us,
you & Mrs. R. & you
cook up Euphrasia &
Gentiana pneu.

If you will not, then
what? I shan't
get Brute, & Hawkes
and adhesion, and
on the table it will be
best generally to present it.
In that case Oleaceae
Asperifoliaceae, Scrophulariaceae
Gentianaceae
come in early and I
must set at 'them when
as soon as I am done
with Compositae
on printing - already 1/4
or more of them are in type.

Dear Engelmann

I write just Dr. Gray has gone to Texas, & may find the catalogue & notes of Lemmon, the collector that came out; he generally has duplicates. All notes & memoranda shall be sent you.

"Cicendia ex altata" you note & that misled me. It is a quadrangularis, when I got sheets of Bentham, Hook. Genl. in Gen. Pl, I found that B. had Kellet Microcala - on the Europ. & E. Amer. species & put in a diff. subtribe from Cicendia on account of undivided pollen - capitate stigma. But in examining I found the stigma bifid in Calif. & E. Amer. plant sometimes as he described it - sometimes divided to base

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved
MISSOURI BOTANICAL GARDEN

always divisible. Some
do. Styles in S. Amer. split
split for drum. But this
looks like a late splitting
I found the insertion on the
stamens in the pieces,
too — as you describe —

I am going to send you
note to Buchanan, to
strengthen mine.
I think, tho, I will go
back and follow him in
adopting "genus Microcala"
I want to compromise in
this regard. Like him in
retiring Stemmen & the
Filipina in Microcala
a Cicendia Philippensis, & simply,
but, oddly I have not fit
specimens. Have you
that with you Look at
them? Reichenbach,
17, t, 1645., does not show
